### D. BACKGROUND AND EXPERIENCE

**(type, size, scope of work, areas of specific expertise)**

Prosvation aims to bridge innovations with markets. To do so, PROSVATION focusES on facilitating events and activities (such as conferences and webinars), building curriculums that could be implemented in educational organizations, and designing learning material and instructional platforms.

Also, THEY help startups and SMEs *expand their networks and disseminate their products* in order to commercialize them, and rich to a level of investor readiness!

EXPERTISE: As an organization THEY have a rich portfolio of building learning platforms, designing learning material, making research and need analysis, creating websites, and creating networks of

interested trainees willing to learn new skills. Also, our team has plenty of experience in project management and product development from Private Sector projects and previous Erasmus+ Projects.

**TEAM**

The team has great experience as individuals in implementing EU projects since we were working on different organizations and institutions since 2017, but we decided to combine our strengths in order to make a bigger impact through our project’s outcomes. Over the last years, they have managed to build a strong and healthy international network with partners all over the European Union and also a local micro-community of stakeholders like VET Schools, Universities, schools, SMEs, and a lot of startups that are willing to embed innovations but need help on finding them.

Target group: PROSVATION is addressing to next generation by trying to build learning subjects that increase critical thinking, digital readiness, learnability, analytical thinking, etc, and to help vulnerable people (such as unemployed, non-educates, imprisoned, etc) increase their employability, both with soft skills but mostly on hard skills.
